

AN OVERVIEW OF TYPE 1 DIABETES MANAGEMENT IN SCHOOLS

This evidence-based course will help learners gain a clear, practical foundation in the basics of Type 1 Diabetes, review current diabetes technologies (including insulin pumps, continuous glucose monitors, and hybrid closed-loop systems), and examine the critical responsibilities and best-practice strategies for supporting students with diabetes in the school setting.

COURSE INFORMATION:

- ✓ Self-paced course
- ✓ Purchase orders will be available
- ✓ Course will open June 2026
